

LEGACY.....WHAT IS IT AND WHY....

When we moved to Florida in 1999, we left behind business associates, friends and family to start enjoying retirement... We came here not knowing anyone. We moved into a gated community and found out that our neighbors were "snow birds"...so much for company. When the High Holidays were approaching, we sought to connect to the one thing that would bring us comfort and help us connect to our spirituality. Finding TSS and their young Rabbi is what got us through some very lonely times. We came to Friday services regularly... and made friends with many

people. ...we volunteered wherever we could help this fledgling Temple. We soon realized that the Temple and the people we connected with, became our family, we cared about them and they cared about us. When we heard about the Legacy Society, we committed without any forethought..it was just a natural progression for us...It is up to us, Jews from all walks of life from all financial means, to help keep the Legacy Society "going" and to be there long after this generation is gone.
